

# BEDVENT™

## Ventilation Mat

BedVent™ | Drainage Mat for Marine and RV / Automotive Applications

### DESCRIPTION

BedVent™ is a revolutionary drainage and ventilation mat that creates an open space between cushions or other objects and your boat or RV. By allowing air to flow, it dries up any moisture present. BedVent™ is the most cost-effective and durable solution to reduce the dampness of condensation under mattresses, cushions and more. It can also be used as a screen to prevent debris from clogging bilge pump intakes and floating switches.

### APPLICATIONS

- Seat Cushions
- Mattresses
- Storage Compartments
- Marine Batteries
- Coolers

### PRODUCT FEATURES / BENEFITS

- BedVent™ is an entangled web with a 90% open-weave design for optimal drainage and ventilation.
- Reduces condensation, mold and mildew
- Our entangled matrix is manufactured out of a proprietary composite.
- Available with or without a breathable fabric heat-bonded onto one side,
- BedVent™ is sold in rolls and easily trimmed with scissors to any desired dimension.
- It requires no mechanical fasteners to install.
- It can also be used as a screen to prevent debris from clogging bilge pump intakes and floating switches.

### PACKAGING

- Thickness: .75" (19.05 mm)
- Roll Size: 39" X 50'
- Roll Weight: 20 lbs. (9.07 kg)
- Sq. Ft. Per Roll: 162.5 (15.10 m2)
- Rolls Per Pallet: 8
- Product Color: White

According to the National Sleep Council, "higher humidity levels in your boat or RV can provide a breeding ground under your mattress for a variety of bacteria, including staphylococcus, enterococcus, norovirus, and, in rare cases, MRSA." By providing ventilation under your mattress you are preventing the growth of dangerous bacteria and fungi.
